

# Nashville City Cemetery

The Nashville City Cemetery is the oldest public cemetery in the city. The Cemetery opened on January 1, 1822 and is the final resting place for 20,000 people including 6,000 African Americans. Though early records from 1822-1846 were lost during the Civil War, internment records from 1946-1979 were transcribed and available for download from the [Nashville City Center Cemetery Association's](#) website. The transcriptions contain many interesting facts.
